

Kickstart your Passion

GEA Brewpub

The new, compact separator skid
for pub, local and niche breweries

GEA brewpub Separator Skid – Every beer's best friend

Brewing fine, tasty beer is already your specialty. Now is the time to raise your passion to the next level! GEA supports you with a state-of-the-art centrifuge solution specially tailored to you, boosting output, speed and beer quality.

What is GEA brewpub Separator Skid? It's every beer's best friend – a beer separator made especially for pub, local and micro breweries. For dedicated brewers with wonderful beers and broad expertise – who are on their way to the next level of quality, flexibility and yield.

What does GEA brewpub Separator Skid do? It makes centrifugal force for you to clarify your beers, adjust and enhance beer quality and to reduce beer losses in the process. It boosts the

same efficiency advantages as larger beer separators, but has been stripped back to essentials to make it GEA's most compact, most affordable beer separator skid.

In other words: It's every beer's best friend.

GEA brewpub Separator Skid comes ready to work on a simple-to-handle skid that fits everywhere.

Be faster to start your next batch

Reduce overall brew times. Centrifuge your beer after fermentation to boost the natural sedimentation process. Cut storage time by a third and respond to demand several days quicker. Reduce the risk of yeast autolysis by separating the yeast.

Use the same machine for

- wort clarification
- beer centrifugation
- polishing of the dry hopping

Make 5–10% more beer right now

Why make – and sell – smaller amounts of fine beer than you have to? Don't throw away beer that is trapped in spent hops and yeast. Clarifying your beer with sensitively applied centrifugal force minimizes losses and increases yield from every batch – without adding further resources.

Ensure consistent clarity/turbidity

Now you can reliably reproduce your beer batch by batch for maximum consistency – GEA brewpub Separator Skid does it for you.

Built-in GEA expertise

Even with accessories strictly kept down to essentials, GEA Brewpub comes with important features and components known from all other GEA beer separators include:

- Classic GEA centrifuge design, based on more than a century of experience
- Patented GEA hydry® ejection system ensures that the solids ejected with this system are concentrated to a maximum. Even coarse hop fibers can be safely ejected!
- Maintenance-free hydrohermetic seal to prevent oxygen pick-up
- New, compact exterior design for effective public display in pub and tavern breweries

GEA brewpub Separator Skid

Beer clarification	from 3 to 20 hl/h
Wort clarification	15 hl/h
Dimensions (H/W/D)	1,187 × 820 × 1,300 mm
Motor	7.5 kW rated

Kickstart your passion!

GEA brewpub Separator Skid comes ready to work on a simple-to-handle skid that fits everywhere. If you are paying close attention to your operating costs, then this practical innovation has all it takes. It works reliably with large service intervals. A free-of-charge first spare part kit is included. Simply connect up and make it work.

We live our values.

Excellence • Passion • Integrity • Responsibility • GEA-versity

GEA is one of the largest technology suppliers for food processing and a wide range of other industries. The global group specializes in machinery, plants, as well as process technology and components. GEA provides sustainable solutions for sophisticated production processes in diverse end-user markets and offers a comprehensive service portfolio.

The company is listed on the German MDAX (G1A, WKN 660 200), the STOXX® Europe 600 Index and selected MSCI Global Sustainability Indexes.
